Aditya Gogia
Batch: 2011

Achievements post DPS: Completed a B.Tech degree in Computer Engineering from Nirma University (First class with Distinction). Currently working as an Applications Engineer in Oracle since 2016. Extremely satisfied with where I am at this current stage of my life, both professionally and personally.

The contribution of DPS: I have always maintained that my two strongest qualities are my persistence and dedication. These were without a doubt cultivated by my time at DPS.

Formative years for any child are essential, and the teachers at DPS did an exceptional job in helping me reach my potential.

Additionally, my experience as an office bearer (Vice Head Boy in 2010 and Head Boy in 2011) has proved invaluable in serving as a ringing endorsement & solid base for the responsibilities I am able to take on in my professional career at a very early stage.
